

FOR CRITICAL PROCESS CLEANING

CANI

COMMITMENT TO CONSTANT AND NEVER ENDING IMPROVEMENT

BioCid

Concentrated Acid Sanitizer

DESCRIPTION:

BioCid is a versatile sanitizer and scale remover and is recommended for cleaning and sanitizing stainless steel and other hard surfaces at a concentration of 200 to 400 ppm active. Use this product to disinfect hard (inanimate) non-porous objects and contact surfaces. BioCid inhibits odor causing bacterial growth on moist surfaces and deodorizes by killing microorganisms that cause offensive odors. This product is especially effective for manual pre-spraying, when necessary, in animal cage wash applications and is also effective for veterinary clinics, kennels, kennel runs and breeding establishments and objects compatible with Ultrasonic cleaning units. BioCid in its use solutions is compatible with stainless steel, aluminum and most other surfaces. Before product use, it is recommended that you apply product to a smaller test area to determine compatibility before proceeding with its use. This product is not recommended for use in spray wash/CIP applications.

DIRECTIONS:

It is a violation of federal law to use this product in a manner inconsistent with its labeling. The first step in any on going sanitation program should be the removal of gross contamination and debris.

Disinfection: Use 1 ounce of this product per gallon of water (or equivalent dilution). Wet all surfaces thoroughly. Treated surfaces should be allowed to remain wet for 10 minutes. Let air-dry. Rinse treated surfaces with potable water.

When used to disinfect in the food processing industry, NO POTABLE WATER RINSE IS ALLOWED.
For Heavy Duty Cleaning: When greater cleaning is desired, use 2 ounces of this product per gallon of water (or equivalent dilution). Heavily soiled areas may require repeated cleaning before treatment.

Do not breathe spray mist.

Contact CANI, Inc. for technical services or product recommendations and efficacy data.

PRODUCT SPECIFICATIONS

Form: Liquid
Odor: characteristic
pH1% solution: 1.8-2.5
Specific Gravity: 1.00-1.20
Solubility: complete
Foam: moderate
