

FOR CRITICAL PROCESS CLEANING

CANI

COMMITMENT TO CONSTANT AND NEVER ENDING IMPROVEMENT

Complete I

One-Step Organic Acid Cleaner And Descaler

For Use On:

Stainless steel
Carbon & urine scales
Oils & proteins
Inorganic salts & scales
Fecal matter
Animal cages
Pharmaceutical/biotech process
cleaning & derouging

DESCRIPTION

Complete I is a glycolic/citrus acid cleaner/descaler formulated for the research, pharmaceutical and biotech industries. It effectively removes a wide range of process and research residues, such as inorganic salts and scales, particulate carbon and urine scale, fecal matter, oil and proteins. This product is very effective in animal cage wash applications and will clean and descale in just one wash cycle, eliminating the use of an alkaline detergent, eliminating a full wash cycle, improve through-put, and reduce water consumption. This product is very effective in pharmaceutical/biotech process cleaning and derouging.

Low foaming COMPLETE I will not cavitate recirculation pumps. COMPLETE I is extremely free rinsing to achieve a clean, residue free surface and has excellent hard water tolerance to eliminate mineral deposits. The surfactant system in COMPLETE I remains effective across a wide temperature and pH range, even during pH neutralization prior to discharge, thus reducing redeposition of process residues.

DIRECTIONS

Typical operating concentrations of COMPLETE I run from 0.2% to 5.0% (v/v) and depend on temperatures, soil loads, and cleaning methods used. COMPLETE I is designed for use in immersion, pressure spray and recirculating spraywash applications and is ideal for animal cage and glassware washing machines and recirculating Clean-In-Place (CIP) systems. Higher concentrations are typically used for periodic derouging and descaling.

Contact CANI, Inc. for technical services or product recommendations.

PRODUCT SPECIFICATIONS

Form: Liquid
Odor: characteristic
pH1% solution: 2.5-3.2
Specific Gravity: 1.08-1.12
Solubility: complete
Foam: low
