COMMITMENT TO CONSTANT AND NEVER ENDING IMPROVEMENT

## CP-718

### NON-HAZARDOUS ALKALINE DETERGENT

#### For Use On:

- Cosmetic devices
- Aluminum
- Animal cages
- Mineral deposits
- Plastics
- Pharmaceutical devices
- Medical devices
- Soft metals
- Laboratory glassware
- Stainless steel

#### DESCRIPTION

CP-718 is a concentrated non-caustic liquid alkaline cleaning agent formulated for the pharmaceutical, biotechnology, cosmetic, and medical device industries. It effectively removes a wide range of process and research residues, proteins, organics, and oils. When used as directed, CP-718 is safe for use on aluminum, galvanized and other soft metals. The product is designed to be an excellent laboratory animal cage wash product at 0.2% to 1% use dilution.

CP-718 is designed to be low foaming at all temperatures for easy rinsing and will not cavitate recirculation pumps. Extremely free rinsing CP-718 provides clean, residue free, surfaces. Chelants provide excellent hard water tolerance that eliminates mineral deposits.

#### DIRECTIONS

CP-718 is designed for use in immersion, pressure spray, and recirculating spray wash applications and is ideal for rack and cage washing machines. Typical operating concentrations of CP-718 vary from 0.2% by volume, to 5% by volume; depending on temperatures, soil loads, and cleaning methods used. Extreme care and protective equipment are required for handling the concentrates and in manual cleaning-see the MSD sheet. Contact CANI, Inc. for technical services or product recommendations.

#### PRODUCT SPECIFICATIONS

Form: Liquid  
Odor: characteristic  
pH1% solution: 10.4-11.4  
Specific Gravity: 1.10  
Solubility: complete  
Foam: low
